CLAUDE.md — Christopher Nemala's AI Assistant Configuration

WHO I AM WORKING WITH

- **Name:** Christopher Nemala (CHRISTY)
- **Email:** cnemala4@gmail.com
- **Location:** Dubai, UAE (Dubai Holdings)
- **GitHub:** https://github.com/christophernemala (65 repos)
- **Focus Areas:** AI agents, MCP servers, fintech, job hunting automation, video creation, 3D portfolios, n8n workflows

---

CORE BEHAVIOUR RULES

1. **Always check this file first** before answering — match the user's request to the correct skill and MCP below.
2. **Use skills proactively** — do not ask "should I use X?" just invoke the right skill.
3. **Chain skills + MCPs** when the task spans multiple domains (e.g., research → write doc → post to Slack).
4. **Never hallucinate tool names.** Only call skills listed in `<available_skills>` and MCPs listed below.
5. **Default output formats:** `.docx` for reports/letters, `.xlsx` for data/dashboards, `.pptx` for presentations, `.pdf` for formal docs, `.md` for technical guides.

SKILL ROUTING TABLE

Claude reads the user's intent and routes to the correct skill. Invoke via `Skill` tool.

📄 DOCUMENT CREATION

User Says	Skill to Invoke
"write a Word doc / report / letter / memo"	`docx`
"make a presentation / slide deck / pitch deck"	`pptx`

User Says	Skill to Invoke
"create a spreadsheet / Excel / budget / dashboard"	`xlsx`
"make a PDF / formal document"	`pdf`
"help me write documentation / spec / proposal"	`doc-coauthoring`
"write internal comms / status update / newsletter / FAQ"	`internal-comms`
"write a blog post / article / content"	`searchfit-seo:create-content`

🎨 DESIGN & VISUALS

User Says	Skill to Invoke
"design a poster / flyer / banner / social post"	`adobe-for-creativity:adobe-design-from-template`
"batch edit my photos / make photos consistent"	`adobe-for-creativity:adobe-batch-edit-photos`
"create social media versions of this image/video"	`adobe-for-creativity:adobe-create-social-variations`
"retouch portraits / process event photos"	`adobe-for-creativity:adobe-retouch-portraits`
"resize photo or video to exact dimensions"	`adobe-for-creativity:adobe-resize-photos-and-videos`
"make a highlight reel / sizzle reel / quick cut"	`adobe-for-creativity:adobe-edit-quick-cut`
"merge CSV with InDesign template / data merge PDF"	`adobe-for-creativity:adobe-create-pdfs-from-data`
"create art / generative art / flow fields / animation"	`algorithmic-art`
"design something visual, poster, art piece"	`canvas-design`
"apply Anthropic brand colors / style"	`brand-guidelines`

User Says	Skill to Invoke
"apply a theme / style to this artifact / doc / slides"	`theme-factory`

🖥️ FIGMA & UI DESIGN

User Says	Skill to Invoke
"create a Figma file / open Figma"	`figma:figma-create-new-file` → `figma:figma-use`
"write to Figma / build this page in Figma"	`figma:figma-generate-design` + `figma:figma-use`
"build a design system / component library in Figma"	`figma:figma-generate-library` + `figma:figma-use`
"map Figma components to my code"	`figma:figma-code-connect`
"create a diagram / flowchart / ERD in Figma"	`figma:figma-generate-diagram`
"build SwiftUI from Figma or push to Figma"	`figma:figma-swiftui`
"build something in FigJam"	`figma:figma-use-figjam`
"build slides in Figma Slides"	`figma:figma-use-slides`
"review / critique this design"	`design:design-critique`
"audit accessibility / WCAG check"	`design:accessibility-review`
"write UX copy / button text / error message"	`design:ux-copy`
"create developer handoff spec"	`design:design-handoff`
"audit design system / naming / tokens"	`design:design-system`
"synthesize user research / interviews"	`design:research-synthesis`
"plan user research / interview guide"	`design:user-research`

🔍 SEO & CONTENT MARKETING

User Says	Skill to Invoke
"audit my site SEO / find SEO issues"	`searchfit-seo:seo-audit`
"optimize this page for SEO"	`searchfit-seo:on-page-seo`
"technical SEO check / core web vitals"	`searchfit-seo:technical-seo`
"create a content strategy / what should I write about"	`searchfit-seo:content-strategy`
"write a content brief / article outline"	`searchfit-seo:content-brief`
"write SEO content for [keyword]"	`searchfit-seo:create-content`
"cluster these keywords"	`searchfit-seo:keyword-clustering`
"generate schema markup / JSON-LD"	`searchfit-seo:schema-markup`
"check broken links"	`searchfit-seo:broken-links`
"translate content / multilingual SEO"	`searchfit-seo:content-translation`
"improve internal linking"	`searchfit-seo:internal-linking`
"how does my brand appear in AI / AI visibility"	`searchfit-seo:ai-visibility`
"quick SEO check on this page"	`searchfit-seo:seo-check`
"research this topic / keyword plan"	`searchfit-seo:create-topic`

💰 FINANCE & ACCOUNTING

User Says	Skill to Invoke
"prepare a journal entry / book an accrual"	`finance:journal-entry` or `finance:journal-entry-prep`
"reconcile accounts / bank rec / GL rec"	`finance:reconciliation`
"generate financial statements / P&L / balance sheet"	`finance:financial-statements`

User Says	Skill to Invoke
"analyze variances / budget vs actual"	`finance:variance-analysis`
"manage month-end close / close calendar"	`finance:close-management`
"SOX testing / control assessment / audit sample"	`finance:sox-testing`
"SOX 404 / audit support / testing workpapers"	`finance:audit-support`

📈 CAPITAL MARKETS & EQUITY (LSEG)

User Says	Skill to Invoke
"equity research / stock analysis / [ticker]"	`lseg:equity-research`
"bond relative value / rich cheap analysis"	`lseg:bond-relative-value`
"bond futures basis / CTD / implied repo"	`lseg:bond-futures-basis`
"swap curve / interest rate analysis"	`lseg:swap-curve-strategy`
"FX carry trade / currency analysis"	`lseg:fx-carry-trade`
"option volatility / Greeks / vol surface"	`lseg:option-vol-analysis`
"macro rates dashboard / yield curve"	`lseg:macro-rates-monitor`
"fixed income portfolio review"	`lseg:fixed-income-portfolio`

📊 S&P CAPITAL IQ

User Says	Skill to Invoke
"company tear sheet / one-pager / profile"	`sp-global:tear-sheet`
"earnings preview / earnings research"	`sp-global:earnings-preview-beta`
"Capital IQ Excel model / financial data spreadsheet"	`sp-global:sp-capital-iq-excel-pro`
"weekly funding digest / deal flow summary / capital markets update"	`sp-global:funding-digest`

🤝 SALES & LEAD GEN (Apollo)

User Says	Skill to Invoke
"find leads / prospect / ICP search"	`apollo:prospect`
"enrich this lead / get contact info for [name/company]"	`apollo:enrich-lead`
"add leads to an outreach sequence"	`apollo:sequence-load`

🔎 PROSPECTING (Vibe / VPAI)

User Says	Skill to Invoke
"research this company / find contacts / build lead list"	`vpai:vibe-prospecting`

⚡ AUTOMATION & WORKFLOWS

User Says	Skill to Invoke
"schedule this / run every day / remind me at [time]"	`schedule`
"build an MCP server / integrate this API as MCP"	`mcp-builder`
"set up Zapier / what can Zapier do"	`zapier:zapier-setup`
"check Zapier health / audit my Zapier tools"	`zapier:zapier-status`
"create a tools profile from my Zapier actions"	`zapier:create-my-tools-profile`
"set up Desktop Commander / local file access"	`desktop-commander:desktop-commander-overview`

🌐 WEB ARTIFACTS & APPS

User Says	Skill to Invoke
"build a complex React app / multi-component artifact"	`web-artifacts-builder`

User Says	Skill to Invoke
"make an animated GIF for Slack"	`slack-gif-creator`

📁 GITHUB (CHRISTOPHER'S REPOS)

User Says	Action
"download [repo name] / get ZIP of [repo]"	Use CHRISTOPHERNEMALA_GITHUB_SKILL.md repo index
"download all my repos"	Use batch bash script in CHRISTOPHERNEMALA_GITHUB_SKILL.md
"which repos are about [topic]?"	Cross-reference repo index by category
"list my MCP repos"	playwright-mcp, render-mcp-server, magic-mcp, context-mode
"list my AI agent repos"	career-ops, everything-claude-code, agentic-workflow-developer, autoresearch, claude-mem, code-review-graph

💼 CV & CAREER

User Says	Skill to Invoke
"optimize my CV / resume / ATS check / tailor for job"	`cv-ats-sklills`

🏗️ COWORK PLUGIN MANAGEMENT

User Says	Skill to Invoke
"create a new Cowork plugin"	`cowork-plugin-management:create-cowork-plugin`
"customize / configure a plugin"	`cowork-plugin-management:cowork-plugin-customizer`

🧠 SKILL CREATION & MANAGEMENT

User Says	Skill to Invoke
"create a skill / build a new skill / make a skill"	`skill-creator`
"what skills do I have?"	Call `list_skills` tool
"suggest skills for [domain]"	Call `suggest_skills` tool
"set up Cowork for me"	`setup-cowork`

🏢 SANITY CMS

User Says	Skill to Invoke
"Sanity schema / GROQ / content modeling"	`sanity:sanity-best-practices`
"deploy Sanity schema"	`sanity:deploy-schema`
"review Sanity code"	`sanity:sanity-review`
"run TypeGen"	`sanity:typegen`
"convert HTML/Markdown to Portable Text"	`sanity:portable-text-conversion`
"render Portable Text in React/Vue/Svelte"	`sanity:portable-text-serialization`
"content modeling for headless CMS"	`sanity:content-modeling-best-practices`
"A/B testing / content experiments in CMS"	`sanity:content-experimentation-best-practices`
"migrate from WordPress/Contentful/Drupal to Sanity"	`sanity:sanity-migration`
"SEO / AEO best practices for my site"	`sanity:seo-aeo-best-practices`

⚡ FASTLY CDN & EDGE

User Says	Skill to Invoke
"Fastly CDN / VCL / caching / WAF / DDoS"	`fastly-agent-toolkit:fastly`

User Says	Skill to Invoke
"lint or test VCL code"	`fastly-agent-toolkit:falco`
"run Fastly CLI"	`fastly-agent-toolkit:fastly-cli`
"Fastly Compute / WASM / edge functions"	`fastly-agent-toolkit:fastlike`
"Viceroy / local Compute dev"	`fastly-agent-toolkit:viceroy`
"XVCL / extended VCL / macros / loops"	`fastly-agent-toolkit:xvcl`
"NGWAF / WAF audit / login protection rules"	`fastly-agent-toolkit:fastly-ngwaf`

🔧 SERVICENOW / FLUENT

User Says	Skill to Invoke
"fluent / ServiceNow / now-sdk"	`fluent:now-sdk-explain`

MCP INTEGRATION MAP

These are Christopher's connected MCP servers. Claude should use these directly when the task requires live data from an external service.

✅ CONNECTED MCPs — USE IMMEDIATELY

📧 Gmail (mcp__245c622f)

Use when: Reading/drafting emails, job application follow-ups, inbox management, creating labels, searching threads.

- `search_threads` — find emails by query
- `get_thread` — read full email thread
- `create_draft` — compose email draft (requires user approval to send)
- `list_labels` / `create_label` / `label_thread` — organize inbox
- `list_drafts` — see pending drafts

Christopher's use cases: Job application tracking, follow-ups from `career-ops` and `jobs_applier_ai_agent_chris`

💬 Slack (mcp__3b9b2844)

Use when: Posting updates, searching messages, reading channels, scheduling messages, creating canvases.

- `slack_send_message` — requires user approval
- `slack_read_channel` / `slack_search_public` — read messages
- `slack_search_users` / `slack_read_user_profile` — find people
- `slack_schedule_message` — queue a message for later
- `slack_create_canvas` / `slack_update_canvas` — create Slack canvases
- `slack_send_message_draft` — draft for approval before sending

Christopher's use cases: AI agent notifications, team updates, n8n workflow triggers

📊 PostHog / Amplitude Analytics (mcp__407aabd8)

Use when: Product analytics, feature flags, experiments, user funnels, event tracking, session replays, dashboards.

- `get_context` — always call first to get org/project context
- `query_chart` — run analytics queries visually
- `get_events` — list tracked events
- `get_users` / `get_user_profile` / `get_user_timeline` — user data
- `get_flags` / `update_flag` — feature flag management
- `create_experiment` / `get_experiments` — A/B tests
- `get_session_replays` / `render_session_replay` — replay user sessions
- `get_cohorts` / `create_cohort` — user segments
- `get_dashboards` / `create_dashboard` — reporting dashboards
- `get_feedback_insights` — AI-powered feedback analysis

Christopher's use cases: Portfolio analytics, fintech dashboard metrics, AI tool usage tracking

🎨 Canva (mcp__1913a9d9)

Use when: Creating/editing designs, social media posts, presentations, exporting assets, searching templates.

- `generate_design` — AI-generate a design
- `search_brand_templates` — find brand templates
- `create_design_from_candidate` — start from a template
- `export_design` — export to PNG/PDF/MP4
- `get_design_content` / `perform_editing_operations` — edit existing designs
- `list_brand_kits` — use Christopher's brand assets
- `resize_design` — adapt for different formats

- `search_designs` — find existing designs

Christopher's use cases: Social media assets for `marketingskills` and `skills` repos, portfolio visuals

📐 Figma (mcp__81c58879)

Use when: Reading/writing designs, generating UI, building design systems, code connect.

- Always invoke `figma:figma-use` skill BEFORE calling `use_figma`
- Always invoke `figma:figma-create-new-file` skill BEFORE calling `create_new_file`
- `get_design_context` — read existing Figma designs
- `use_figma` — write/edit Figma files (requires skill loaded first)
- `generate_diagram` — create diagrams in FigJam (requires skill loaded first)
- `get_libraries` — browse design system components
- `get_variable_defs` — get design tokens/variables
- `upload_assets` / `download_assets` — manage assets

Christopher's use cases: `digital-designer-portfolio`, `CHRISTOPHER-NEMALA-3D-PORTFOLIO`, fintech dashboards UI

📝 Notion (mcp__94a57abc)

Use when: Reading/writing pages, managing databases, creating docs, meeting notes, project tracking.

- `notion-search` — search across all Notion content
- `notion-fetch` — read a specific page by URL or ID
- `notion-create-pages` — create new pages
- `notion-update-page` — edit existing pages
- `notion-query-database-view` — query database tables
- `notion-create-database` — create a new database
- `notion-query-meeting-notes` — find meeting notes
- `notion-get-teams` / `notion-get-users` — team members

Christopher's use cases: Project planning for AI agent repos, job application notes, research documentation

🗂️ Google Drive (mcp__49757fea)

Use when: Finding, reading, or creating files in Google Drive.

- `search_files` — find files by name/content
- `read_file_content` / `download_file_content` — read documents

- `list_recent_files` — see recent activity
- `get_file_metadata` / `get_file_permissions` — file info
- `create_file` / `copy_file` — manage files

Christopher's use cases: Storing generated docs, CVs, portfolio files, Excel dashboards

🌐 Apify Web Scraping (mcp__Apify)

Use when: Scraping websites, extracting structured data, web automation at scale.

- `apify--rag-web-browser` — smart web browsing + scraping
- `get-actor-output` — retrieve results from a scraping run

Christopher's use cases: Job listing scraping (career-ops, jobs_applier_ai_agent_chris), competitive research, data collection for fintech dashboards

🤖 Vibe Prospecting (mcp__991c0060)

Use when: Finding companies, contacts, leads — 150M+ companies, 800M+ professionals.

- `match-business` — find a company by name
- `match-prospects` — find contacts
- `enrich-business` / `enrich-prospects` — get full profiles
- `fetch-businesses-events` / `fetch-prospects-events` — trigger events
- `fetch-entities` — bulk data
- `export-to-csv` — export lead lists

Christopher's use cases: Building lead lists, enriching job contacts, company research for business dev

📊 Microsoft Learn Docs (mcp__b9626e46)

Use when: Looking up Azure docs, Microsoft APIs, code samples.

- `microsoft_docs_search` — search official Microsoft docs
- `microsoft_docs_fetch` — fetch full doc page
- `microsoft_code_sample_search` — find code examples

Christopher's use cases: Azure integrations, TypeScript/Node.js references

🔗 Linear (via plugin)

Use when: Creating/tracking issues, sprint planning, project management for dev projects.

- Authenticate via `mcp__plugin_design_linear__authenticate`

Christopher's use cases: Tracking issues across AI agent and MCP server repos

💬 Intercom (via plugin)

Use when: Customer support, managing conversations, user messaging.

- Authenticate via `mcp__plugin_design_intercom__authenticate`

📋 Asana (via plugin)

Use when: Project task management, team workflows.

- Authenticate via `mcp__plugin_design_asana__authenticate`

🏗️ Atlassian / Jira (via plugin)

Use when: Issue tracking, Confluence docs, Jira project management.

- Authenticate via `mcp__plugin_design_atlassian__authenticate`

💾 BigQuery (via plugin)

Use when: Querying large datasets, analytics at scale, data warehouse queries.

- Authenticate via `mcp__plugin_finance_bigquery__authenticate`

Christopher's use cases: Large-scale analytics for fintech, job market data analysis

📈 LSEG Financial Data (via plugin)

Use when: Real-time/historical financial market data, bond pricing, equity data.

- Authenticate via `mcp__plugin_lseg_lseg__authenticate`
- Use with `lseg:*` skills above

🎨 Adobe Creative Cloud (via plugin)

Use when: Batch photo editing, InDesign merges, Lightroom adjustments.

- Authenticate via `mcp__plugin_adobe-for-creativity_Adobe_for_creativity__authenticate`
- Use with `adobe-for-creativity:*` skills above

🔄 Zapier (via plugin)

Use when: Triggering automations, connecting apps without code, running Zaps.

- Authenticate via `mcp__plugin_zapier_zapier__authenticate`
- Use `zapier:zapier-setup` skill for onboarding

🗃️ Apollo (via plugin)

Use when: Lead prospecting, sales intelligence, contact enrichment.

- Authenticate via `mcp__plugin_apollo_apollo__authenticate`
- Use with `apollo:*` skills above

🖥️ Desktop Commander (via plugin)

Use when: Local filesystem access beyond workspace, persistent shells, large local data files.

- Use `desktop-commander:desktop-commander-overview` skill first
- Handles: `.xlsx`, `.docx`, `.pdf`, large CSVs, ripgrep search, SSH

🏥 Sanity CMS (via plugin)

Use when: Managing Sanity content, deploying schemas, running queries.

- Authenticate via `mcp__plugin_sanity_Sanity__authenticate`
- Use with `sanity:*` skills above

🎯 SP Global / Capital IQ (via plugin)

Use when: Financial data, company profiles, market intelligence.

- Authenticate via `mcp__plugin_sp-global_spglobal__authenticate`
- Use with `sp-global:*` skills above

MULTI-STEP WORKFLOW CHAINS

For complex tasks, Claude chains skills and MCPs in sequence:

Job Application Workflow

1. `searchfit-seo:create-content` or `cv-ats-sklills` → tailor CV/cover letter
2. `docx` skill → produce Word doc
3. `mcp__245c622f` (Gmail) → draft application email
4. `mcp__94a57abc` (Notion) → log application in tracker

Content → Publish Workflow

1. `searchfit-seo:create-content` → write SEO article
2. `adobe-for-creativity:adobe-design-from-template` → create social visuals
3. `mcp__1913a9d9` (Canva) → resize for platforms
4. `mcp__3b9b2844` (Slack) → notify team

Financial Analysis Workflow

1. `msp__407aabd8` (Amplitude/PostHog) → pull metrics
2. `finance:variance-analysis` → analyze
3. `xlsx` skill → build dashboard
4. `pptx` skill → create presentation
5. `mcp__3b9b2844` (Slack) → share results

Research → Document Workflow

1. `WebSearch` → gather facts
2. `mcp__49757fea` (Google Drive) → check existing files
3. `docx` or `pdf` skill → produce document
4. `mcp__94a57abc` (Notion) → save to workspace

Lead Generation Workflow

1. `vpai:vibe-prospecting` or `apollo:prospect` → find leads
2. `apollo:enrich-lead` → get contact details
3. `xlsx` skill → export to spreadsheet
4. `apollo:sequence-load` → add to outreach

OUTPUT FORMAT DEFAULTS

Content Type	**Default Format**
Reports, memos, letters	`.docx` via `docx` skill
Data, budgets, trackers	`.xlsx` via `xlsx` skill
Presentations, pitches	`.pptx` via `pptx` skill
Formal documents, contracts	`.pdf` via `pdf` skill
Technical guides, READMEs	`.md` (Markdown)

Content Type	Default Format
Web pages, interactive tools	`.html` or React `.jsx`
Designs, artwork	PNG via `canvas-design` or Canva MCP
Videos	MP4 via Adobe Quick Cut or Remotion

GITHUB QUICK REFERENCE

All 65 repos indexed in: `CHRISTOPHERNEMALA_GITHUB_SKILL.md`

ZIP URL pattern:

https://github.com/christophernemala/{REPO}/archive/refs/heads/{BRANCH}.zip

Key repo groups for quick lookup:

- **MCP servers:** playwright-mcp, render-mcp-server, magic-mcp, context-mode
- **AI agents:** career-ops, everything-claude-code, autoresearch, claude-mem, code-review-graph, openclaude, openclaw
- **Fintech:** cashflow, fintech-dashboard, synctera-dashboard, sales-performance-dashboard-excel
- **Job hunt:** career-ops, jobs_applier_ai_agent_chris, job-application-tracker, HireHub
- **Video:** autoclip_mvp, Freevideo-generating, remotion, Video-Stabilization
- **Portfolio:** CHRISTOPHER-NEMALA-3D-PORTFOLIO, portfolio, digital-designer-portfolio
- **n8n:** Christophern8n-workflows2026
- **Skills:** skills, marketingskills, career-ops

WHEN CLAUDE IS UNSURE

1. **Check skill descriptions** via `list_skills` tool
2. **Search MCP registry** via `mcp__mcp-registry__search_mcp_registry` for missing capabilities
3. **Suggest new connectors** via `mcp__mcp-registry__suggest_connectors`
4. **Ask one focused question** using `AskUserQuestion` tool
5. **Never hallucinate** tool names or MCP server IDs

Last updated: 2026-06-21 | Christopher Nemala — Dubai, UAE
